DETAILED ACTION

Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-6 and 11-17, drawn to a lens device that is driven over a zoom interval by driving control means specifically for that purpose, classified in class 348, subclass 240.3.
 - II. Claims 7-10, drawn to a lens device for an electronic camera without a zoom interval or zoom driver, classified in class 348, subclass 360.
 - III. Claims 18-20, drawn to a lens device for an electronic camera that is driven over a zoom interval without zoom driving means, classified in class 348, subclass 335.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as subcombination and combination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the presence of the two inventions suggests that (a) the lens device driven over a zoom interval by driving control means, (b) an electronic camera using the lens device driven over a zoom interval by driving control means within the lens, and (c) an electronic camera using the

Application/Control Number: 09/390,264

Art Unit: 2612

lens device without the zoom interval and zoom driving means are, allegedly in the view of the Applicant, patentably distinct inventions. The subcombination has separate utility such as in a camera without a zoom function.

Inventions I and III are related as subcombination and combination. The combination as claimed does not require the particulars of the subcombination as claimed because the presence of the two inventions suggests that (a) the lens device driven over a zoom interval by driving control means, (b) an electronic camera using the lens device driven over a zoom interval by driving control means within the lens, and (c) an electronic camera using the lens device operating with a zoom interval but without a zoom driving means within the lens are, allegedly in the view of the Applicant, patentably distinct inventions. The subcombination has separate utility such as in a camera with a user-moved zoom lens.

- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason T. Whipkey, whose telephone number is (703) 305-1819. The examiner can normally be reached Monday through Friday from 9 A.M. to 6:30 P.M. eastern daylight time, alternating Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wendy R. Garber, can be reached on (703) 305-4929. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9314 for regular communication and (703) 872-9315 for After Final communication.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Technology Center 2600 Customer Service Office, whose telephone number is (703) 306-0377.

Response to this action should be mailed to:

Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450

or faxed to the appropriate number above for communications intended for entry. (For informal or draft communications, please label "PROPOSED" or "DRAFT".)

Hand-delivered responses should be brought to the sixth floor receptionist of Crystal Park II, 2121 Crystal Drive in Arlington, Virginia.
